## Materials

- ◆ index cards
- ◆ masking tape

## Sight Word Activity

### Guess Who

Choose several sight words, and write each word on an index card to create a class set of word cards. Tape a word card to each student's back. Have students walk around the room and ask each other yes or no questions (e.g., *Does it have four letters? Does it start with the letter w?*) to discover which word is on their back. When they correctly guess the word on their card, tell them to move the card to their shirt front and continue answering other students' questions.

## Sight Word Readers Series
