Materials

- ◆ index cards
- ◆ paintbrushes
- ◆ cups of water

Sight Word Activity

Water Words

Choose a set of sight words, and write each word on several index cards to create a class set of word cards. Take the class to an open area of pavement. Give each student a word card, a paintbrush, and a small cup of water. Invite students to dip their paintbrush in the water and write their sight word three or more times on the pavement. Challenge them to paint a sentence that includes their word. Ask students to exchange word cards and repeat the activity with a different word.
